

M-SCD

The screenshot shows the M-SCD software interface. At the top, it displays 'Administrador' and 'BCN LOGISTICA, S.A. - BARCELONA' with the date '28/02/12'. The main window is divided into several sections:

- Header:** Includes 'DUA' (1), 'Transito' (checked), 'Aduana' (unchecked), 'GAC' (unchecked), and 'Usuario'.
- Sender (2. Expedidor):** Name 'RIOJANA', Address 'CAMINO VIEJO DE SARRIA, 87', Postal '011 08024', Population 'BARCELONA'.
- Recipient (8. Destinatario):** Name 'DISTR. DE BEBIDAS BACO', Address 'C/ MAYOR, 13', Postal '011 08620', Population 'SANT VICENÇ DELS HORTS'.
- Declaration (1. Declaración):** Aduana '011', GAC '0', Identificador, Autenticador, and GAC '0000000000'.
- Massa Bruta (40. Manifiesto/Nro.):** Incrementar '968', Dedu '0,00'.
- Origin and Destination (15. País Expedición, 16. País Origen, 17. País Destino):** All are 'ES' (España).
- Conditions (20. Condiciones Entrega):** Método pag. 'FOB', EUR '0,00', 1,000000.
- Access code and Guarantee (A. Access code y Garantía):** Cd.Gar '0', Garantía '0'.

 A table on the right lists various customs codes and descriptions, such as 'ADUANA LAS PALMAS MARITIMA', 'ADUANA AEREA TENERIFE', and 'ADUANA BARCELONA'.

SCD management

Automatic SCDs generation from services.

FEATURES

- 1 Data are retrieved directly from the shipments for the generation of SCDs.
- 2 The shipment retrieves automatically scales (complementary SCDs, FOB and CIF values, amount of duties / taxes) from SCD for invoicing.
- 3 Have been established multiple automatic in generation and invoicing SCDs and included templates to minimize mistakes, production costs and time resolution.
- 4 Integrations with Portel, with Taric and state agencies through Edifact.
- 5 Sending and receiving documents electronically to Association of Customs Agents and other agencies.

The M-SCD module is fully integrated with MYMSOFTERP application. Thanks to the multiple automatic processes of generation and invoicing SCDs stressing that any new data is entered only once in the application, errors, production costs and resolution times are minimized. The application allows MYMSOFTERP generation of: export SCD, import SCD and transit SCD. The first two also apply to the GAC (Autonomous Government of the Canary Islands). For the generation of any SCD, can be accessed directly from the shipment and able automatically to capture data from the shipment, although it is possible to do so without linking it to any expedition. For making SCD header, is possible to use the user predefined templates, so it is not necessary to fill any field simply revise, or as well if there is no template it is only necessary to fill in the following three areas: customs presentation, delivery status and date of invoice. To generate the line item is only necessary to write down customs statistics position of the goods. It can be done in three different ways

depending on the physical location of the database: retrieving information from the MYMSOFTERP database classified by customer and / or statistical line item, for connection to external programs or manually filling to generate line item. At the same time that the line item is filled, automatic process on tax calculation and tax launches. It also allows to retrieve information for all SCDs of a conveyance, details like name of the boat, truck registration, customs facilities, manifestos, flag, container number, etc. and impacting each specific SCDs that common data conveyance. Some of the functions covered by MYMSOFTERP module are: automatic generation of SCD, automatic recovery of the same scales for invoicing, shipping and receiving SCD telematics to Association of Customs Agents and other agencies; different integrations Portel, with Taric and other state agencies through Edifact, control contractions and payments; listing and printing of customs documentation and inspection services, such as folders, DV1, A13, guide movement, etc.

THE ORGANIZATION

Our team of consultants, experts in your business, will be able to give response to your business needs and advising you on improving your internal circuits and procedures, getting at all times to minimize implementation times on projects. The Excellence as service and development philosophy vocation, and Meeting the Expectations of our customers as a *raison d'être*, from a business vision focused to become your strategic partner, with which you can count on today and always to make every day more competitive and differentiate your organization in terms of technology.

THE SERVICES

From M.SOFT Worldwide, we collaborate with our customers to make every day their organizations more competitive, through various ancillary services to the development of our solutions, being able to classify them according to the relationship stage as:

Assessment of opportunities

- Requirement customer analysis and data collection for preparation of prototypes
- Identify improvement opportunities on the current situation, based on the shift levers both technological and process
- Selecting the best solutions combination of our catalogue, which achieve better meet the needs and expectations of our customers
- Project evaluation and return on inversion analysis according to each customers individual indicators
- Support to the definition of the technology platform

Implantation

- Detailed analysis of business processes
- Implantation consulting of our solutions
- Identification and development of customers particularities
- Support to start/stabilization projects

Maintenance and evolutionary support

- Help Desk Level 2 support
- Maintenance and evolutionary support of our solution
- Evolutionary development particularity required by customer
- Implantation of new modules and functionalities

THE SOLUTIONS

From M.SOFT Worldwide, we offer Information System Solutions specially conceived and designed to get the most out of your resources applied to its operations:

Complete management of your business as **Logistic Service Provider**, through our Integrated Management System (**ERP: Enterprise Resource Planning**)

Managing of your Transport and Warehouse operations, such as **Manufacturer or Distributor**, through our **TMS (Transportation Management System)** and **WMS (Warehouse Management System)**

Mobilization processes, **for the entire industry**, through our **MOBILITY** modules multi-platform (on Smartphone or Tablet devices) specialized by industry or bespoke developed for your business

All of them we can offer both on purchase and rent mode and can be installed on customers own platforms or outside data center processing (Cloud) through partners who M.SOFT Worldwide provides for this purpose.

Request a remotely or in person demonstration of our solutions, and let us show you, how we can add value to your business.
