Evolución costes

M.SOFT Worldwide

Control costs, expenses, productivity and profitability of vehicles.

FEATURES

1 Control of fleet costs and profitability of the item from the group, comparing it against the ideal vehicle.

2 Control of repairs, maintenance of stocks of spare parts, fuel tanks control...

3 Link with GPS systems to capture relevant costs data.

4 Control tire mounting footprint and wear details thereof.

5 Cost calculation of element per kilometer for the correct allocation of the same services performed in.

M-FLEET module is part of our comprehensive MYMSOFTERP information systems solution for transport and logistics sector, thus contributing to improving the competitive advantage of your fleet. With this module it is possible to increase productivity while also can detect and prevent actions and negative trends about the fleet, reducing the costs of operation and maintenance thereof. The system collects the various costs introduced by applying the only data policy of our solution (in which any new data is entered once into the system) and used to calculate the various cost factors that can be attributed to the fleet.

With M-FLEET module of MYMSOFTERP applicative we have a scalable solution that meets the specific needs of each customer. It is a powerful software for monitoring and optimizing the management of fleets of vehicles that can control the variables that we consider relevant. Get process information allowing to monitor, measure and control key areas of a particular fleet of vehicles. There is the ability to link to GPS systems to capture data on costs, feeding back valid information to MYMSOFTERP solution.

M-FLEET module allows control costs and expenses, productivity and profitability of vehicles. Allows to know the state of the fleet, take control reviews by date or kilometers; manage control of repairs, manage maintenance of stocks of spare parts to keep track of fuel tanks, perform automatic import files refueling provided by tank, tire inspection and assembly thereof, forecast consumption, keep track of measurements of tire mark, carry out periodic inventories, etc…

MYMSOFTERP system based on a set of specific algorithms is able to find the average cost per kilometer and vehicle group, projecting against the average to know the level of profitability achieved by each vehicle group versus vehicle ideal. In this same way, the system allows to analyze the costs of the fleet, as well as by vehicle, brand, and model or vehicle groups and as an expense item, article, amounts, units, liters, etc...

The excellence in Information Systems for transportation, logistics and process mobility

THE ORGANIZATION

Our team of consultants, experts in your business, will be able to give response to your business needs and advising you on improving your internal circuits and procedures, getting at all times to minimize implementation times on projects. The Excellence as service and development philosophy vocation, and Meeting the Expectations of our customers as a raison d'étre, from a business vision focused to become your strategic partner, with which you can count on today and always to make every day more competitive and differentiate your organization in terms of technology.

THE SERVICES

From M.SOFT Worldwide, we collaborate with our customers to make every day their organizations more competitive, through various ancillary services to the development of our solutions, being able to classify them according to the relationship stage as:

Assessment of opportunities

- Requirement customer analysis and data collection for preparation of prototypes
- Identify improvement opportunities on the current situation, based on the shift levers both technological and process
- Selecting the best solutions combination of our catalogue, which achieve better meet the needs and expectations of our customers
- Project evaluation and return on inversion analysis according to each customers individual indicators
- Support to the definition of the technology platform

Implantation

- Detailed analysis of business processes
- Implantation consulting of our solutions
- Identification and development of customers particularities
- Support to start/stabilization projects

Maintenance and evolutionary support

- Help Desk Level 2 support
- Maintenance and evolutionary support of our solution
- Evolutionary development particularity required by customer
- Implantation of new modules and functionalities

THE SOLUTIONS

From M.SOFT Worldwide, we offer Information System Solutions specially conceived and designed to get the most out of your resources applied to its operations:

Complete management of your business as Logistic Service Provider, through our Integrated Management System (ERP: Enterprise Resource Planning)

Managing of your Transport and Warehouse operations, such as Manufacturer or Distributor, through our TMS (Transportation Management System) and WMS (Warehouse Management System)

Mobilization processes, for the entire industry, through our MOBILITY modules multi-platform (on Smartphone or Tablet devices) specialized by industry or bespoke developed for your business

All of them we can offer both on purchase and rent mode and can be installed on customers own platforms or outside data center processing (Cloud) through partners who M.SOFT Worldwide provides for this purpose.

Request a remotely or in person demonstration of our solutions, and let us show you, how we can add value to your business.

M.SOFT Worldwide

Is since 1989 an Independent Software Vendor (ISV) for over 25 years of dedication to transport and logistics, developing and implementing software for comprehensive management operations (ERP/TMS/WMS) and software mobilization processes for the entire industry (MOBILITY), offering a scalable framework for our customers, with solutions adapted to the latest technologies and existing needs, reliable, proven and installed in our park.

More than 350 credentials, confirm our experience as an organization, in the management of small, medium and large accounts, proving it our wide ability on service and the confidence coverage of our solutions.
