Dangerous goods

Control of inconsistencies in the handling, loading, transportation and unloading of dangerous goods.

FEATURES

- 1 Compatibility control for preventing inherent risks to people, property or the environment.
- 2 The control is implemented through the UN codes by classification, nature, packaging, distinction and solution of dangerous goods.
- 3 Inclusion of database to UN codes and compatibility tables according to ADR, DGR, IMDG, RID regulations.
- 4 Linkable with EDI module for file sharing and WMS module for control and Warehouse Management of MYMSOFTERP.
- 5 Includes the annual report issued by the safety adviser in compliance with the regulations established.

MYMSOFTERP through ADR module facilitates strict compliance with the legislation and standards of practice in the field of dangerous goods, in order to prevent inherent risks to people, goods or the environment. ADR product allows to control the incompatibilities between different types of goods warning of the dangers in loading, unloading, handling and transport of dangerous goods. ADR product for monitoring dangerous goods of MYMSOFTERP solution for logistics operators, have been incorporated three basic elements of control by the UN, compatibility tables according to type of goods and compatibility tables as code label types. The control is executed by classification, type, packaging, distinction and solution of dangerous goods. The ADR module from MYMSOFTERP is based on the UN product identification. This takes first into account, the classification of dangerous goods according to the degree of danger of its components; second, the nature of the dangerous substances and articles transported; third, packaging and packing, fourth, physical and chemical materials

distinction, fifth, different solutions and mixtures; it is approved internationally and marked by the specifications of packaging and packing of dangerous goods and requirements for loading, unloading, transport and handling.

This integrated in modular ERP MYMSOFTERP tool has the necessary compatibility tables for types of goods as well as compatibility tables according to types of labels, which aims is to control by separation of goods and packaging control, solution, volume, gross weight, net weight or total weight respectively. The system incorporates the annual report issued by the safety adviser in compliance with the regulations established.

This ADR module, linked to MYMSOFTERP raises the potential of the results in a warehouse integrated with WMS module. If it is also integrated with the automated data exchange module, allows to receive load orders via EDI eliminating transcription or manipulation of information errors. These fully integrated automation helps in reducing risks for the professionals involved on the supply chain.
